TECHNICAL SKILLS

Languages

Java | JavaScript (ES6+) | Python | SQL

Frameworks & Stack

React.js | Node.js | Express.js | Spring Boot | MERN Stack

Databases & Tools

MongoDB | MySQL | Git | GitHub | REST APIs

Core Competencies

Deployment | Full-Stack Dev | Agile / Scrum | Team Collaboration

EDUCATION

2023 – 2026 (Expected)
BSc (Hons) Software Engineering
Cardiff Metropolitan University

Completed
Higher National Diploma (HND)
Software Engineering, ICBT Campus

Completed
Diploma in English
British Way English Academy

Completed
G.C.E. A/L & O/L
Secondary Education

CHANNA KAVISHKA SADARUWAN

SOFTWARE ENGINEERING INTERN | TRAINEE SOFTWARE ENGINEER

PROFESSIONAL PROFILE

Final-year BSc (Hons) Software Engineering student with practical experience building full-stack web applications, interactive 3D interfaces, and Java backend services. Delivered 3 production web apps and 2 enterprise backend systems with React, Node.js, Spring Boot, MySQL, and MongoDB. Seeking a Software Engineering Internship / Trainee role to engineer robust features and contribute to production-grade software.

FEATURED PROJECTS

Café Nuwara

Live Demo | GitHub

JavaScript (ES6+), Three.js (WebGL), GSAP ScrollTrigger, Lenis, Tailwind CSS

Architected an interactive 3D web platform using Three.js and WebGL to deliver real-time model rendering at steady 60 FPS. Engineered scroll-driven timeline transitions using GSAP ScrollTrigger and Lenis smooth-scrolling with responsive mobile optimization. Deployed live on Vercel.

IFurnish Shop

Live Demo | GitHub

MERN Stack (MongoDB, Express.js, React.js, Node.js), Three.js, REST APIs

Developed a full-stack furniture e-commerce web application featuring real-time 3D product customization powered by Three.js WebGL. Built secure RESTful APIs with Node.js and Express, implementing JWT authentication, persistent cart state, and dynamic MongoDB catalog filtering. Deployed live on Vercel.

AnimeVerse

Live Demo | GitHub

React.js, Node.js, Express, REST APIs, Tailwind CSS, Custom Domain Hosting

Engineered a dynamic media discovery platform integrating external RESTful APIs with client-side caching to reduce redundant network roundtrips. Implemented debounced real-time query search, responsive dark-mode styling, and production deployment on custom domain (animeverse.lol).

Oceanview Reservation System

GitHub

Java, Spring Boot, MySQL, Hibernate, Spring Data JPA, MVC Architecture

Architected an enterprise hotel booking system using Java and Spring Boot following layered MVC and repository patterns. Designed relational MySQL schemas with Hibernate/JPA, enforcing ACID transactional consistency across room availability, reservations, and check-ins.

HealthShield AI

GitHub

Java, Spring Boot, MySQL, RESTful Backend Services, Role-Based Access

Engineered scalable Spring Boot backend REST services for electronic health records (EHR) and patient tracking. Implemented role-based access control (RBAC), request validation, and transactional data persistence with MySQL.

PROJECT HIGHLIGHTS

5 Projects	3 Live Deployments	2 Tech Stacks
Full-stack and backend	Vercel & Custom Domain	MERN and Spring Boot
