CHANNA KAVISHKA SADARUWAN

SOFTWARE ENGINEERING INTERN • TRAINEE SOFTWARE ENGINEER

📍 Alawatugoda, Sri Lanka • ☎ +94 70 457 3602 • ✉ channasadhruvan@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Final-year BSc (Hons) Software Engineering student with practical experience engineering full-stack web applications, interactive 3D WebGL interfaces, and enterprise Java backend services. Proven track record of shipping **3 live production deployments** across Vercel, custom domains, and cloud environments. Proficient in **Java, Spring Boot, JavaScript (ES6+), React.js, Node.js, Express, MySQL, and MongoDB**, with strong foundational knowledge in relational database design, RESTful architectures, and clean code principles. Seeking a Software Engineering Internship / Trainee role to contribute immediately to production feature delivery while expanding enterprise architectural capabilities.

TECHNICAL SKILLS

Languages:	Java (Core & OOP), JavaScript (ES6+), Python, SQL (MySQL)
Frontend & 3D:	React.js, Next.js, Three.js (WebGL), GSAP ScrollTrigger, Lenis Smooth Scroll, Tailwind CSS, HTML5/CSS3
Backend & APIs:	Node.js, Express.js, Java Spring Boot, RESTful APIs, Spring Data JPA, Hibernate, JWT Authentication, MVC
Databases & Tools:	MySQL, MongoDB (Mongoose), Git, GitHub, Postman, Vite, Vercel, Railway, npm
Core Competencies:	Full-Stack Web Engineering, Relational Database Modeling, System Architecture, Agile/Scrum, Problem Solving

TECHNICAL PROJECTS

Café Nuwara — Interactive 3D Web Application

Live Demo ↗ • GitHub ↗

Tech Stack: JavaScript (ES6+), Three.js (WebGL), GSAP ScrollTrigger, Lenis, Tailwind CSS, Vercel

- **Architected a real-time 3D web application** utilizing Three.js and WebGL rendering pipeline to deliver interactive model manipulation with steady 60 FPS viewport performance.
- **Engineered scroll-synchronized animations** with GSAP ScrollTrigger and Lenis smooth scrolling, mapping camera transformations and layer-by-layer asset anatomy breakdowns to user scroll depth.
- **Optimized asset pipelines and bundle delivery** with asset compression and progressive rendering, achieving sub-2s First Contentful Paint (FCP) across mobile and desktop devices.

iFurnish Shop — Full-Stack E-Commerce & 3D Product Customizer

Live Demo ↗ • GitHub ↗

Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Three.js, REST APIs, Tailwind CSS

- **Built a full-stack furniture commerce web application** featuring real-time 3D WebGL material and texture customizers using Three.js mesh manipulation.
- **Engineered RESTful backend services with Express and Node.js**, implementing JWT token authentication, bcrypt password security, persistent cart management, and checkout workflow APIs.
- **Structured normalized MongoDB schemas with Mongoose**, enabling high-performance multi-criteria search, category filtering, and inventory status tracking.

ApparelFlow ERP — Garment Manufacturing Batch Execution System

Live Demo ↗ • GitHub ↗

Tech Stack: React.js, Next.js, Node.js, Express.js, Role-Based Access Control (RBAC), Tailwind CSS

- **Developed an industrial manufacturing execution system** automating garment production batch verification, defect audits, and strict sewing queue gate workflow controls.
- **Implemented multi-role RBAC access management** providing distinct permissions and audit logging for cutting masters, quality checkers, and production line supervisors.
- **Delivered production web deployment on Vercel** with responsive operational terminals and live batch status dashboards.

Oceanview Reservation System — Enterprise Hotel Booking Platform

GitHub ↗

Tech Stack: Java, Spring Boot, MySQL, Hibernate, Spring Data JPA, MVC Architecture

- **Developed an enterprise reservation system** using Spring Boot following clean layered MVC, service-layer business logic, and repository abstraction patterns.
- **Engineered relational database models with Hibernate/JPA**, enforcing ACID transactional consistency across room availability checks, reservation booking lifecycles, and check-in/out workflows.
- **Created secure RESTful service endpoints** with centralized exception handling and input validation for front-desk personnel and system administrators.

AnimeVerse — Dynamic Media Discovery Platform

Live Demo ↗ • GitHub ↗

Tech Stack: React.js, Node.js, Express, REST APIs, Tailwind CSS, Custom Domain Hosting

- **Built a discovery platform** featuring debounced real-time title search, genre multi-filtering, and client-side cached data models to optimize response times.
- **Configured custom domain production deployment (animeverse.lol)** with responsive mobile navigation and dynamic dark-mode styling.

EDUCATION

BSc (Hons) in Software Engineering — 2023 – 2026 (Expected)
Cardiff Metropolitan University • Undergraduate Degree
Key Coursework: Data Structures & Algorithms, Object-Oriented Software Engineering, Database Systems, Web Application Architectures, Distributed Computing, Software Quality Assurance.

Higher National Diploma (HND) in Software Engineering — Completed
ICBT Campus

Diploma in English — Completed
British Way English Academy • Professional English Communication
