FEATURED SOFTWARE PROJECTS

iFurnish Shop — 3D WebXR Furniture E-Commerce Platform	MERN Stack Three.js WebXR
- Architected a production-grade 3D e-commerce web platform enabling real-time WebGL model customization (colors, materials) and browser-based Augmented Reality (WebXR) room projection. - Engineered complete backend services with Node.js, Express, and MongoDB, integrating secure Stripe checkout payments, Cloudinary CDN media uploads, and JWT authentication. - Developed a comprehensive Admin Dashboard for dynamic product inventory management and real-time sales tracking.	
Anime Site / Onisaga Media Hub — Dynamic Content Discovery Web App	MERN Stack Next.js
- Built a responsive media discovery web application with dynamic catalog browsing, real-time search queries, and interactive carousel sliders. - Implemented RESTful API endpoints for streaming metadata and user bookmark lists with fast MongoDB document lookups.	
Oceanview Reservation System — Enterprise Hotel & Resort Booking Platform	Java Spring Boot MySQL
- Developed a multi-tier reservation management system enabling automated room bookings, availability management, and billing calculations. - Designed normalized MySQL database schemas with ACID transaction compliance, foreign key constraints, and role-based access control.	
HealthShield AI — Health Record & Diagnostics Management Application	Java Spring Boot MySQL
- Developed backend RESTful services for secure patient health metric logging, appointment scheduling, and record analytics. - Integrated secure data persistence layer in MySQL with data validation and role-based authorization.
