SUMMARY

Final-year BSc (Hons) Software Engineering student (Cardiff Metropolitan University, expected 2026) building full-stack web apps, 3D / WebGL interfaces, Java backend services, and explainable ML models. Built and deployed 3 live web apps with React, Node.js, and MongoDB. Seeking a Software Engineering Internship / Trainee role. **Available to start immediately.**

TECHNICAL SKILLS

Languages: Java (Core, OOP), JavaScript (ES6+), Python, SQL
Backend & APIs: Node.js, Express.js, Spring Boot, Spring Data JPA, Hibernate, REST APIs, JWT, Stripe
Frontend & 3D: React.js, Three.js, WebGL, WebXR (AR), GSAP, Lenis, Tailwind CSS, HTML5, CSS3
Databases: MySQL, MongoDB
Machine Learning: Scikit-learn, Pandas, XGBoost, LightGBM, CatBoost, SHAP, Streamlit
Testing & Tools: JUnit, Jest, Maven / Gradle, Git, GitHub, Vercel, Agile / Scrum

PROJECTS

iFurnish Shop – 3D E-Commerce App with AR Preview (BSc Final Thesis)

Tech: MERN Stack (MongoDB, Express.js, React.js, Node.js), Three.js, WebXR (AR), Stripe, Vercel
Live demo: i-furnish-shop.vercel.app | **Code:** github.com/C-KAVISHKA/iFurnish_Shop

- Built a full-stack store with real-time 3D customization and WebXR AR room preview on mobile.
- Developed REST APIs (Node.js, Express) with JWT auth, Stripe payments, cart, and MongoDB filtering.

Oceanview Reservation System – University Project

Tech: Java, Spring Boot, MySQL, Hibernate, Spring Data JPA, MVC Architecture
Code: github.com/C-KAVISHKA/oceanview-reservation-system

- Built a hotel booking system in Spring Boot with layered MVC, a service layer, and repository patterns.
- Designed Hibernate / JPA models with ACID transactions for availability, bookings, and check-ins.

Café Nuwara – Interactive 3D Web Application

Tech: JavaScript (ES6+), Three.js (WebGL), GSAP ScrollTrigger, Lenis, Tailwind CSS, Vercel
Live demo: cafe-nuwara.vercel.app | **Code:** github.com/C-KAVISHKA/cafe-nuwara

- Built a real-time interactive 3D web app with Three.js and WebGL at a steady 60 FPS.
- Added scroll-synced animations with GSAP ScrollTrigger and Lenis, mapped to camera movement.

HealthShield AI – Explainable Machine Learning App (University Project)

Tech: Python, Streamlit, Scikit-learn, Pandas, XGBoost, LightGBM, CatBoost, SHAP
Code: github.com/C-KAVISHKA/healthshield_ai

- Built an explainable ML app in Streamlit using a soft-voting ensemble (XGBoost, LightGBM, CatBoost).
- Used SHAP for interpretability and feature importance; validated with 5-fold cross-validation.

AnimeVerse – Media Streaming and Discovery Platform

Tech: JavaScript (ES6+), Node.js, Express.js, HLS.js, ArtPlayer, Tailwind CSS, Custom Domain Hosting
Live demo: animeverse.lol | **Code:** github.com/C-KAVISHKA/anime-site

- Built an Express.js stream proxy with client-side caching to cut redundant network requests.
- Integrated ArtPlayer and HLS.js for adaptive playback, with debounced search and dark mode.

EDUCATION

BSc (Hons) in Software Engineering, Cardiff Metropolitan University | 2023 – 2026 (Expected)
Coursework: Data Structures & Algorithms, Database Systems, Distributed Computing, Software QA
Higher National Diploma (HND) in Software Engineering, ICBT Campus | Completed
Diploma in English, British Way English Academy | Completed
G.C.E. Advanced Level and Ordinary Level (A/L & O/L), Secondary Education | Completed
